Version 5 “Full” Installation Instructions

Hello Tradesmen’s Customer:

For installing Tradesmen’s On Screen 3D Estimator, please follow these steps.

1. Download, Save and Install the **Setup*.exe** found on <http://tradesmens.com/updates/downloads/>.
2. On the 3rd screen on the install, choose “Full Install” [Next]
3. Verify destination folder on the 4th screen of the install, this is the destination drive directory. Our recommended default (automatic) location for a local install is C:\TSI\OS3DE. [Next]
4. This next screen will give you the opportunity to review your settings and go <Back> should you need to make changes. [Next]
5. You may not need to install the **Sentinel Protection Installer**, unless there have been updates to the driver. Running the install will not hurt anything and make sure you do have the latest driver in place. Your call, uncheck the box to skip that install.
6. Tradesmen’s Software OS3DE imports image files. If you have no other conversion tool for PDF files, (Adobe Standard, BlueBeam, Planswift, etc.) you will want to install the PDFtoTIFF conversion program. Suggested configuration can be found on the bottom of <http://tradesmens.com/updates/downloads/>. Check/Uncheck if needed/not needed. [Next]
7. Install using defaults for Sentinel Protection Installer and PDFtoTIFF.
8. [Finish]
9. Launch the Program. The program will require a pass-code for licensed customers Please call **1800-429-9002** with the extended license screen present.
